Reminder: Volume II - Rules of Procedure of FISav adopted by the general assembly of October 02, 2005 in Paris (France), modified by the general assembly of the FISav of Thursday 30 October 2014 in Rome (Italy)

- Article 11 - § 2: International Competitors: License and Nationality

General principles:

- In the course of a sports year, an international competitor must, in principle, only be licensed to the national organization of Savate, affiliated to FISav, of the country of which he is a national.
- In the course of a single sports year, the fact that a competitor is simultaneously licensed in different national bodies affiliated to FISav is not allowed without specific written agreement between the national groupings concerned which would issue these licenses, and prior agreement of the FISav.
- The competitor must present an identity document (passport, identity card ...) attesting to the nationality represented during any participation in the official competitions of the FISav.

- Article 11 - & 2 A: Before 18 years:

In the case that a competitor has only one nationality,

- The competitor participating in an official FISav competition may only represent the country of which he / she is a national. Provided that he is at the same time a member of the national body (affiliated to FISav) of which he is a national.

In the event that a competitor has more than one nationality,

- The competitor may represent only one country in an official FISav competition. The competitor represents the country of which he is a national and in which he is licensed without being able to represent another nationality until reaching 18 years.

However, as an exception to the preceding provisions, an athlete may participate in an official FISav competition by being presented by a member country affiliated to FISav of which he / she is not a national, provided that the following two cumulative conditions are met:

- a): The athlete (under 18 years of age) must be permanently resident in the country of the affiliated member who has registered them for at least the 3 calendar years preceding the date of the competition. Such permanent residence must be attested by an official document issued by an authorized public authority.

- Article 11 - & 2 B: After 18 years:

General principle (reminder),

The competitor cannot represent a country of which he is not a national.

In the event that a competitor has only one nationality,

The competitor participating in an official FISav competition may only represent the country of which he / she is a national. He/she is registered by the national organization, affiliated to the FISav, of which he/she has the nationality.

In the event that a competitor has more than one nationality,

After 18 years of age, the athlete, at the time of his first registration in an official international competition of the FISav, chooses a nationality of which he holds the passport, without being able to represent another nationality during his whole sports career in Savate.

Possibility of change of national representation,

However, as an exception to the previous provision, whilst having more than one nationality, and having already competed in an official international competition of the FISav for a nationality, the athlete may represent another nationality of which he has the passport:

- The nationality he wishes to represent is the nationality of his country of birth, where there never existed an official structure affiliated to FISav. The use of this right by the athlete is irreversible.
- The territory in which he lives and practices Savate (is licenced) changes his nationality due to a constitutional modification (separation, annexation of the territory) recognized by the United Nations.
